## ENZI LOW TEMP

### Bio-Active Laundry Concentrate

A concentrated laundry detergent which can be used as a stand-alone or as an one-shot boost additive for extra stain-removing power on laundry linen and garments. This enzymatic product combats a wide range of soiling and is a great choice for commercial laundries, nursing homes, hotels or simply where efficient stain removal is needed.

#### Directions

Dosage of the product depends on the level of soiling and application. For laundry of heavy duty soiling use 12-14g per kg of dry weight laundry. For general laundry, use 8-10g per kg of dry weight laundry. For pre-soak, or use as a booster add 5-6g per kg of dry weight laundry. Allow garments to soak for minimum 2hours.

#### MPI APPROVED C33 (All animal product except dairy)

This is a laundry compound. If treated fabric directly or indirectly comes in contact with edible product, a thorough rinse with potable water must follow the laundering process.

- **POWER OF ENZYMES**
- **EFFECTIVE PRE-WASH & SOAKER**
- **EXTRA LAUNDRY BOOSTER**
- **CONCENTRATED**

#### PROPERTIES

APPEARANCE	White powder
pH	11.5 for a 1% solution

#### REORDER
