## LAUNDRY SOLVE

### Laundry Stain Remover

A concentrated, fast-acting agent that removes stubborn grease and oil stains and can be used as a laundry additive or spot pre-treatment. It can be used for cotton, polyester and their blends. Safe on woolens.

#### Directions

Usage will vary depending on soiling levels and types. Add to the wash with or without other detergents and alkali. Light to moderate soiling: 60-150mls per 30kg wash. Heavy soiling: 200mls per 30kg wash. To use as a stain pre-treatment: spray directly onto affected area, work it gently into a fabric with clean cloth or soft brush, leave to react for 30mins minimum, follow with wash cycle. Polyester/cotton uniforms and work gear: 60-150mls. Table linen, mechanics overalls, dust mats and mops: 60-150mls.

#### MPI Approved C33 (All animal products except dairy)

This is a laundry compound. If treated fabric directly or indirectly comes in contact with edible product, a thorough rinse with potable water must follow the laundering process.

**ONLY FOR USE IN COMMERCIAL MACHINES**

- **COMBATS TOUGH STAINS**
- **POWERFUL PRE-SPOTTER**
- **EFFECTIVE WASH ADDITIVE**
- **INDUSTRIAL STRENGTH**

#### PROPERTIES

APPEARANCE	Clear Liquid
FRAGRANCE	Petroleum ether smell
SPECIFIC GRAVITY	0.77
