## OG1-CLEAN

### Combination Oven Cleaner

A specialist cleaner for the toughest cleaning tasks. Used for combination / commercial ovens, grills, racks and deep fryers. OG1-Clean removes a variety of heavy soiling, including grease, oils and carbonised deposits.

#### Directions

For automatic machines: place pick up tube in the container of chemical and set the machine to self cycling cycle. For manual cleaning: Heat oven 70oC on "Convection" program, then spray all internal surfaces, shelves and trays, close the door and increase temperature to 100oC for 10minutes to auto steam. Then switch off and rinse all surfaces including the air intake plate and drain to opening. Spray approx. 20ml into steam opening (near cooking chamber light) as required, and rinse. Repeat for heavy soiling. Leave door slightly open after cleaning. To clean other recommended surfaces, spray neat OG1-Clean on, leave for 3-5 minutes, wipe off dirt with damp cloth, or scrape with spatula. Rinse with clean water. CAUTION: This product is not suitable for aluminium or untreated mild steel. Test before use on brass, tin, copper, galvanised and painted surfaces. OG1-Clean is safe to use on stainless steel, vitreous enamel, iron, chrome and glass.
