

CHEMEX

PRO MOSS KILL

Algae Mould Moss & Lichen Control

A concentrated cleaner that removes and controls re-growth of moss, mould, mildew and lichen. Its prolonged action makes the product, time and cost-effective. Biodegradable at recommended dilution rates.

Directions

Initial application: Use at a ratio of 1:20 (50 ml per litre) with cold potable water. Subsequent applications: Use at a ratio of 1:40 (25 ml per litre). Spray onto surfaces and leave. For best results allow a dry contact time of at least 3 hours. Most surfaces do not require rinsing although some aged painted surfaces may require a rinse to avoid streaking. Only spray on areas intended for treatment. For best results treat dry surfaces on an overcast day to allow the diluter product to soak into a surface. Do not apply if there is the likelihood of rain with 24 hours. If used as directed the treated surface can stay free of moss, mould and lichen for up to 12 months.

Good Practice

Under Good Practice Protocol (based on accepted international research), a 1 % solution of this product, diluted with potable water, is recommended with liberal application on clean hard surfaces with a minimum contact time of 10 minutes. At this concentration the product provides 3400PPM QAC.

- **ACTIVE FOR 12 MONTHS**
- **CHLORINE-FREE**
- **CONCENTRATED FORMULA**
- **LONG-LASTING ACTION**
